# Introduction

## RoboCupSG CoSpace Coding Challenge 2023 (Autonomous Driving Category – Smart Transportation)

- Teams are required to solve 5 individual tasks commonly used in smart transportation for the coding challenge, such as
  - Navigation challenge
  - Smart sensing challenge
  - Path planning challenge
- The challenge missions are designed to increase in difficulties and complexities as students progress from the Primary to the Secondary category. This increasing complexities is reflected in various aspects of the challenge tasks.

# Introduction

## RoboCupSG CoSpace Coding Challenge 2023 (Autonomous Driving Category – Smart Transportation)

- **Teams**

- Primary Category:
  - 8 – 12 years old (in season 2023: born years: 20011 – 2015)
- Secondary Category
  - 13 – 16 years old (in season 2023: born years: 2007 – 2010)
- Each participant can only register for one CoSpace coding challenge team.
- Each team must have a team leader.
  - Be responsible for communication with officials during the game.

## RoboCupSG CoSpace Coding Challenge 2023 (Autonomous Driving Category – Smart Transportation)

- **Field**

- Road colour: White or Black
- Elements in field
  - Lines
  - Buildings, fence, walls, etc which block the robot's movement
  - Colour markers on floor

## RoboCupSG CoSpace Coding Challenge (Autonomous Driving Category – Smart Transportation)

### Open Challenge Example

The smart car changes its speed autonomously based on the colour maker on road.

Slow  
Normal  
Fast

GUI Coding

```

RGB Demo D.py  X
144 def Game0():
145     global Duration, CurAction, CurGame
146     global WheelLeft, WheelRight, LED_1
147     global MyState_1, US_Front, IR_L3, IR_L2, IR_L1, IR_R1, IR_R2, IR_R3,
148     bOnRed = CS_R>=220 and CS_G<=32 and CS_B<=32
149     bOnGreen = CS_R>=220 and CS_G<=32 and CS_B<=32
150
151     if Duration>0:
153         elif IR_L3>=1 and bOnRed: #RED-L3
156         elif IR_R3>=1 and bOnRed: #RED-R3
    
```

Code in Python

```

RGB Demo D.c  X
Miscellaneous Files (Global Scope)
175 }
176 void Game0()
177 {
178     bool bOnRed = CS_R >= 220 && CS_G <= 32 && CS_B <= 32;
179     bool bOnGreen = CS_R <= 32 && CS_G >= 220 && CS_B <= 32;
180
181     if(Duration>0) { ... }
185     else if(IR_L3>=1 && bOnRed) { ... }
190     else if(IR_R3>=1 && bOnRed) { ... }
195     else if(IR_L2>=1 && bOnRed) { ... }
200     else if(IR_R2>=1 && bOnRed) { ... }
    
```

## RoboCupSG CoSpace Coding Challenge 2023 (Autonomous Driving Category – Smart Transportation)

- **Challenge Task (SuperTeam)**

- SuperTeam is the combination of 2 – 3 teams from different schools.
- SuperTeam participants will have opportunity to use both virtual and real robots (CoSpace) for Smart Transportation challenge.
- Real robots will be provided by the organiser.

# Judging & Scoring

## RoboCupSG CoSpace Coding Challenge 2023 (Autonomous Driving Category – Smart Transportation)

- **Scoring**

### Primary Category

- Task 1: Navigation challenge I – 10%
- Task 2: Navigation challenge II – 15%
- Task 3: Smart sensing challenge – 15%
- Task 4: Open challenge I – 30%
- Task 5: Open challenge II – 30%

### Secondary Category

- Task 1: Navigation challenge – 10%
- Task 2: Smart sensing challenge – 15%
- Task 3: Path planning challenge – 15%
- Task 4: Open challenge I – 30%
- Task 5: Open challenge II – 30%

## RoboCupSG CoSpace Coding Challenge 2023 (Autonomous Driving Category – Smart Transportation)

- **Team Sharing and Presentation Video**

- Teams are encouraged to submit a team sharing and presentation video (Template will be given)
- Selected videos will be featured on the RCAP Academy Official YouTube Channel ([www.youtube.com/RCAPacademy](http://www.youtube.com/RCAPacademy)) and be eligible for the RoboCup Singapore Influencer Awards.
  - People's Choice Award
  - Most Popular Video Award
  - Educational Value Award
  - Community Awareness Award
  - Community Building Award

# Introduction

## RoboCup SG CoSpace Coding Challenge 2023 (Autonomous Driving Category – Delivery)

- In RoboCup SG CoSpace coding challenge auto-driving category tertiary group, teams need to develop and program a virtual robot car based on the Intelligent Transportation System (ITS) to solve the last mile delivery challenge.

## RoboCupSG CoSpace Coding Challenge 2023 (Autonomous Driving Category – Delivery)

- **Field**

- Intelligent Transportation System (ITS)

- Providing robot's position and orientation with respect to road's center line
- Providing location of all distribution centres and collection stations
- Providing information of the nearest navigation point to the delivery robot.

## RoboCupSG CoSpace Coding Challenge 2023 (Autonomous Driving Category – Delivery)

- **Challenge Task (Tertiary)**

- To plan the most efficient route, devise suitable tactics, and code the virtual delivery robot to navigate through a smart city. The autonomous robot must successfully transport all the pre-loaded tasks to each collection station by following the planned optimal path.
- The game will end either by the successful delivery of all items or if the maximum allotted delivery time has been surpassed.
- For details, refer to the official rules:

[https://robocupap.org/Rule\\_Book/RCAP\\_CoSpace\\_Auto\\_Delivery.pdf](https://robocupap.org/Rule_Book/RCAP_CoSpace_Auto_Delivery.pdf)

## CoSpace Coding Challenge @NRC

# FAQ

## RoboCupSG CoSpace Coding Challenge 2023 (Autonomous Driving Category – Smart Transportation)

### 2. What software used for RoboCup SG Coding Challenge (Auto-Driving category)

- CoSpace Autonomous Driving Simulator
- It can be downloaded from 1 July 2023. Download link will be send to registered teams.

### 3. Where there be any training workshop by organizer?

- Yes. The 2-hours training workshop will be conducted by CoSpace Committee in July. Details will be sent to registered teams

### 4. Where can we buy the real robots?

- OC will provide the real robot

### 5. What should be included in the Technical demonstration video?

- Video template will be provided
