STEAM WORKSHOPS

FOR EARLY CHILDHOOD EDUCATORS

**Inspire STEAM play, spark ideas, and bond
through hands-on science activities for
Early Childhood educators.**

Science Centre Singapore's dedicated Children's Science Gallery

At KidsSTOP™, we introduce STEM concepts to children aged 8 and below through interactive play, creative drama, and hands-on activities.

KidsSTOP™ approach

1 Scientific Inquiry

Our hands-on activities spark curiosity, allowing children to develop science process skills while having fun.

2 Play-Based Learning

Our play-based learning, enhanced by creative drama, encourages imagination and exploration. Children engage in role-playing, developing social skills, confidence, and communication in a fun and interactive environment.

3 Aligned with the NEL Framework

Our immersive workshops target multiple learning areas in the NEL framework, providing a holistic experience while keeping science relevant and enjoyable!

Why Choose Us?

Boost Your Science Confidence

Experience the scientific method through engaging experiences that provide practical ways to explore science alongside your children.

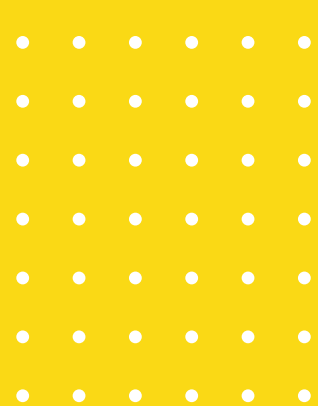

Engage Diverse Learners

Keeping all preschoolers engaged is key! We give you adaptable strategies to capture and hold their interest, no matter their needs.

Making Science Real, Relevant and Right for The Young Ones

Developmentally appropriate activities connect scientific principles to everyday life, sparking curiosity and fostering deeper understanding for young learners.
